Mushrooom Facts

- Mushrooms grow from spores, not seeds
- A single mushroom can release 16 million spores
- Every year, fungi make 50 million tons of spores, that is enough to coat every squart millimeter of the Earth's surface with 1,000 spores each.
- Mushrooms double in size EVERY. SINGLE. DAY!
- Mushrooms are an excellent source of Vitamin D, which helps us have strong bones, teeth and muscles.
- Mushrooms contain more potassium than a banana!
- Mushrooms are full of antioxidents
